EXPERIENCE

August 2017- now	**Software Engineer, Ailleron** *S.A.*
	Worked in a team responsible for the A/V layer of the system dedicated to contact between bank consultants and clients. Most of the tasks were combining high-level elements of the C# as well as those hardware close in C++. Extensively worked with audio-video codecs, WinAPI and many other key libraries and system components for the multimedia layer.
September 2015 – August 2017	**Software Engineer,** *G2A.COM*
	Created, developed and tested the Internet applications created for sale of electronic goods. Worked with a wide spectrum of technologies, including PHP (versions 5 and 7), Zend, Silex, RabbitMQ, MariaDB, PostgreSQL.
December 2013 – September 2015	**Software Engineer, 3***SOFT S.A.*
	Software development and testing. Participated in projects for a telecommunications company, a voivodeship office, a pharmaceutical company and for the company's own needs. Used technologies such as: C #, WinAPI, SharePoint, PHP, JavaScript, jQuery.

EDUCATION

2014-2015	**Rzeszow University of Technology, Master degree***,* Specialization*:* Software engineering. Thesis title: Privacy and security of data on tablets and mobile phones with Android and Windows Phone
2010-2014	**Rzeszow University of Technology, Bachelor degree,** Specialization: Software engineering. Thesis title: Kinect as modern user interface tool

ADDITIONAL QUALIFICATIONS

Actively participated in scientific conferences and published few scientific articles

Tens of finished courses focused mostly on either software engineering or machine learning. For instance: Data Workshop - Practical Machine Learning, Microsoft Professional Program Data Science

Membership in scientific circle, IEEE and ACM
